

Job Description

Full Stack Developer (Freshers)

(Junior Associate)

About the Company:

Celebal Technologies is a premier software services company in the field of Data Science, Big Data, and Enterprise Cloud. Celebal Technologies helps you to discover the competitive advantage by employing intelligent data solutions using cutting-edge technology that brings significant value to any organization. Our full stack development teams leverage the latest in backend and frontend technologies to architect robust, scalable, and secure web solutions.

About the Role:

We are looking for enthusiastic and passionate Full Stack Developers to join our growing development team. In this role, you will be responsible for designing and developing scalable backend services and interactive front-end applications. You will work closely with cross-functional teams to build complete web solutions for our clients using modern programming languages and cloud platforms.

Eligibility Criteria

- Qualification: B.Tech (CSE/IT/ECE), M.Tech , MCA
- No Active Backlogs
- Passing out year: - 2026
- 60% throughout the career

Designation

Junior Associate

Key Responsibilities Areas (KRA's)

- Design and develop scalable backend applications using C#/.NET Core, Python, Node.js, or Java.
- Build responsive and dynamic front-end interfaces using HTML5, CSS3, JavaScript, and modern frameworks (React, Angular, or Vue.js).
- Implement RESTful APIs and integrate them with various client applications.
- Work with cloud technologies (Azure, AWS, or GCP) for deployment and scalability of applications.
- Use JWT-based authentication and authorization in web applications.
- Collaborate with other team members and stakeholders to deliver high-quality software.
- Follow best practices in code quality, testing, and version control.

Desired Skills

- Proficiency in backend technologies like C#/.NET Core, Python, Node.js, or Java.
- Familiarity with front-end technologies and frameworks such as HTML, CSS, JavaScript, React, or Angular.
- Understanding of RESTful APIs and microservices architecture.
- Basic understanding of database systems like MySQL, PostgreSQL, or MongoDB.
- Knowledge of Git version control.
- Good problem-solving skills and attention to detail.
- Basic understanding of Agile methodologies like Scrum or Kanban.
- Strong verbal and written communication skills.

Other Additional Skills (Good to have)

- Experience working with cloud platforms like Azure, AWS, or GCP.
- Familiarity with CI/CD pipelines and DevOps practices.
- Understanding of JWT-based authentication and secure API design.
- Exposure to container technologies like Docker and Kubernetes
